Fire has requested we add additional sidewalks for safety to the event center. We would also like to pave a pad during this time so we can better store our tip and roll bleachers, which are currently stored on grass. This will result in a minor budget increase of \$3,660; however, it will save us from mobilizing them again. Thanks for the consideration.

David

My understanding is that some of the rear exits do not drop onto a solid surface, so from a safety perspective, we want to make sure someone in a wheelchair could get out of any exit in the building during an emergency. So I think that solving this issue, along with adding some solid surface for bleacher storage, would be worth asking for an additional \$4k in order to have sufficient budget.

Mike
