July 3, 2024

Mr. Lee,

The current estimate for the cost to install underground 3 phase primary lines and the transformer for the new soccer fields on Hwy 98 is **\$56,693.00**, based on the assumed future location of the transformer, as discussed. This price includes a \$1,000.00 charge for the removal of 2 padmount transformers that were in the footprint of the new fields. That work has been done, but has not yet been invoiced. This price also does not include any cost for secondary service from the transformer to the meter, due to questions concerning the location of the service, as well as service size.

This estimate is good for 30 days from the date specified above.

Sincerely,

Leon Barber
