I am fine with this coming forward. One thing that might be good to mention is whether we anticipate any efficiency gains from the replacement. Typically, newly installed units have substantially improved energy efficiency from that of the old unit, so I am curious if we have any information on that.

Good morning, please see the attached regarding our request to move forward with purchasing a new A/C unit to replace the existing failed unit that controls the courtroom at the Foley Justice Center. The cost to repair the existing unit exceeds the amount to replace it.

We are aiming for an agenda date of 05/02/2022.

This will require an increase of \$24,000.00 to the capital account.

Thank you in advance for your consideration and approval, have a wonderful week!
