Dear Ms. Southern,

Please pass this information to the City Council regarding the CWRC/Polk plumbing status:

- The remaining cost due Polk plumbing are NOT pump cost, (which is why he was unwilling to retrieve the pump). In my recent phone conversation with Mr.Les Polk he explained the pump itself was the property of CWRC because it was paid for before he put it in the ground. As I mentioned the entire pump situation was something done during my absence and my knowledge of the details was only what was relayed to me by my partner at the time. Having said that, in further discussion with Mr.Polk the balance due is for 600+ feet in plumbing ;lines and the labor to do the work. Therefore I have discussed the situation with Mr.Polk and we have come to an agreement to pay the balance off as we are able by earmarking a portion of our event money...(30%) when we have future events. In the meantime there has been a \$500.00 check sent to him until this agreement can be put into writing.

Thank you and I believe we are tables for the next meeting so I will see you there. Thank again.
