New beaver dams 10/15/2018 and 10/21/2018

Mr. Hellmich, Chad Christian,

After your follow up from 09/28/2018 where I responded to you with good news of no sidings of beavers or dams, we had a surprise on 10/15/2018 with three beaver dams from the end of our property to Mr. Cloud Swetnamd's property 1705 Thames Drive. Yesterday 10/21/2018 Mr. Swetnamd and I walked all the way down to Rivertrace One and Fielding Park Drive and discovered a huge dam with the water runoff all blocked and a big lake already established between the watershed off South Hickory and our storm drainage. The water already was rising, it also will affect Mr. Don Wilson's property, we opened up every dam so some of it can run off but of course we are not able to take care of the beavers, so the USDA would need to come in again to catch them. We will do whatever it takes to help with the clean up of the dams afterwards.

Thank you for your help

Kurt Atzlinger
