Randy Kurtts reported to the Council that he has taken additional steps in determining what would be needed for the preservation of the Hamburg property. The first phase would include replacement of the roof, cutting of trees, and termite bait stations. Phase two would include siding and wall rebuilding work on the building, which would cost approximately \$40,000.00. Mr. Kurtts reported that without knowing the general purpose goal of the building it is hard to generate an exact estimate of how much this project could cost the City. Council Member Ralph Hellmich reported to the Council that it is hard to get exact pricing without a use in mind and that the City should reach out to the Hamburg family and request flexibility with the use and timing of this project, if it were to be accepted. City employees will reach out and meet with the Hamburg family for the potential of this project. There was a consensus to carry this item over to the December 18, 2017 Work Session Agenda. There was no further discussion on this item.
