Re: Proposed Fill Soil Classification & Evaluation
Sidewalk Project at Glenn Lakes
Foley, Alabama

Dear Mr. Stokes:

CTL, Inc. is pleased to have the opportunity to provide a cost estimate to complete the requested soil evaluation at the above referenced project.

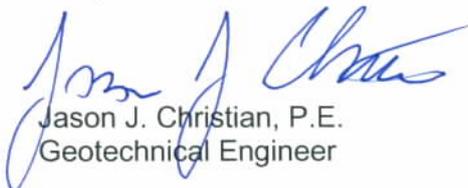

The requested scope of work includes collecting a sample of the proposed select fill material to be used to support the proposed concrete sidewalk. We will perform soil classification testing and moisture-density relationship testing in our soils laboratory on the collected sample. We will use the laboratory data to evaluate the fill materials suitability for use as select fill on the project. We can provide the above scope of work for a cost of **\$500.00**.

Our work hereunder will be completed in general accordance with the applicable ASTM standards and with generally accepted current standards of geotechnical engineering practices. No other warranties are expressed or implied. We have attached our *General Conditions of Agreement with the Client (Exhibit "B")*, which describes the miscellaneous provisions of our CTL-Client relationship. These conditions are subject to final negotiation. A copy of our current general (\$1,000,000/\$4,000,000 limits) and professional liability (\$2,000,000/\$2,000,000 limits) insurance certificates will be provided upon request.

Please feel free to contact our office if you have any questions or if you need any additional information. We look forward to discussing our services with you in greater detail as this project advances.

Sincerely,

CTL, Inc.

Jason J. Christian, P.E.
Geotechnical Engineer
