Re: Industrial Park

Per your request, the cost to make drainage improvements at the city's property in the industrial park which is adjacent on the North and West sides of the HCP Pumps project site is \$6,877.00.

The work will be done in accordance with the attached site grading and drainage plan which shows the drainage improvements centered on the North and West property lines. Sodding and seeding is included. The cost of the work is based on the work being accomplished concurrently with the HCP Pump project sitework.
