City of Foley Randy Kurtts 200 N Alston Street Foley AL 36535

Worked To Be Performed At

Item	Description	Cost
Rotten Wood Repair	Match existing siding for replacement on the City Arts Building. Replace 900 sq ft of deteriorated siding with the matched siding. There is viable damaged siding slightly above the window sills extending to the bottom run of siding on the north and south sides of the building. Both sides of the parapet show significant siding deterioration. All viable siding damage will be replaced encompassing the 900 sq ft. Extensions have been added to the window sills and are showing signs of deterioration. These extensions have no current flashing which would shed water away from the siding. The deteriorated sill extensions will be replaced and flashing will be installed before the new siding is installed. **The handicap ramp decking boards will be removed to access the siding. Flashing will be installed in the building along the ramps edge before the new siding is installed to prevent future deterioration. The removed handicap decking boards will be reinstalled.**	6,750.00
Rotten Wood Repair	Approximately 300 sq ft of 1/2 inch sheathing is deteriorated between the siding and the framing primarily below the windows. 15/32 3 ply cdx sheathing will be used to replace the deteriorated sheathing. The sheathing will be covered with a vapor barrier and the above described flashing will be applied before the new siding is installed.	2,375.00
Pressure Wash	Pressure was all sides of building exterior.	250.00
Paint	Apply a copper coat wood treatment to the back side of the new siding before installation. This preservative is effective in protecting wood from rot, mildew and fungus. Prime the face of the new siding before installation. Paint the north, south and both sides of the parapet top to bottom including 12 windows.	1,870.00

I approve the work listed on this estimate only. Any add-ons will be listed on a separate estimate.	Signature	Total	\$11,245.00
