Description	Total
Roof Moisture Survey  The following is a Proposal for a Moisture Survey of the Foley Police Department Roof (FPD) located at the above address, approximately 29,000 square feet. This proposal includes all labor and materials needed to perform the Survey. This proposal assumes either internal roof hatch access to the roof provided by FPD or exterior ladder access to the roof provided by Amerson Roofing, Inc. is available. Inspector will require night-time access to the roof and will need two days to complete the scan. Survey to be conducted according to ASTM C1153 Standard Practice for Location of Wet Insulation in Roofing Systems Using Infrared Imaging.  Survey to include the following: 1. Perform an infrared moisture inspection to identify wet roof areas. 2. Verify all wet areas with a capacitance moisture probe and/or test cut. 3. Outline each wet area on the roof surface with visible paint. 4. Included in Report: a. Scaled Roof Plan with the location, size and contour of all wet areas. b. Infrared Thermograms of wet areas located. c. Digital photographs identifying the Thermograms. d. Analysis and recommendations. e. Budget estimates for various methods of repair.	2,000.00
