Scope of Work
Willow Oaks and Waterford Storm Water Inlet Repairs

Contractor to provide labor, supervision, equipment and all materials required for this project.
A City of Foley business license and general liability insurance is required. This is a **LUMP SUM** Project.

Required: Willow Oaks S/D – Construct new inlet tops and repairs to 4 existing storm water inlets on Turf Creek Drive

Waterford S/D- Demolish and make modifications to 3 existing storm water inlets and demolish 1 existing inlet top and replace in kind on Waterford Drive.

General Notes:

1. No work to be performed at night.
2. Contractor is responsible for maintaining a safe worksite at all times. This shall include providing personnel, markers, barricades, flagging, barrels, cones, etc. as required to maintain a safe project worksite. If it is determined by City Engineer or his representative that required safety measures or devices are inadequate, work shall stop until issue is rectified to the satisfaction of City Engineer or his representative. There is no pay item or extra change for this work.
3. Erosion control devices are the responsibility of the contractor with no additional pay for such.
4. Contractor is required to provide a portable toilet at jobsite.
5. Contractor to provide topsoil as required and to sod all disturbed areas of job site.
6. Contractor to remove all debris from jobsite and dispose of offsite.
