A Resolution Approving the Beulah Heights Drainage Project Design

The Environmental Department requests council approval to allocate the funds for the assessment, design, engineering, permitting and construction management for the Beulah Heights Drainage Project. The proposal is from Thompson Engineering for the services. This would also include the videoing, vacuuming and jetting of the drainage pipes flowing to the Michigan Street Regional detention pond with a sub-contractor. The proposal is for \$160,600. There will be grant funds to assist with the construction of the project. Early estimates show the total budget being \$750,000 for construction of a fore bay, dredging and retrofitting of the outlet structure to an automated outlet structure (to maximize capacity) The capital plan reflects the project spending \$330,000 this year.
